Ad-hoc announcement in accordance with § 15 WpHG

Negative impact on 2014 earnings caused by major Swiss customer in the solar sector filing for insolvency

Passau, December 2, 2014 – InTiCa Systems AG, which is listed in the Prime Standard on Frankfurt Stock Exchange (ISIN DE0005874846, Ticker IS7) announces that it can no longer achieve the forecast issued for fiscal 2014. This is due to the direct threat of revenue shortfalls and exceptional expenses resulting from the unexpected insolvency application filed by one of the Industrial Electronics segment's biggest customers for inverters, the Swiss-based company Sputnik AG with the bankruptcy authorities in Biel, Switzerland, on November 28, 2014. The impending shortfalls will have a negative impact on earnings in fiscal 2014.

A final assessment of the exact level of damage cannot be made at present as this depends on the Swiss insolvency proceedings in respect of the assets of Sputnik AG and their outcome. However, impairment losses and write-downs of up to EUR 750,000 are probable on receivables and own work capitalised. In addition, the insolvency affects inventories with a carrying amount of EUR 1.8 million. The Board of Directors is currently examining alternative internal and external uses for these inventories.

InTiCa Systems AG

The Board of Directors

About InTiCa Systems:

InTiCa Systems is a European leader in the development, manufacture and commercialization of inductive components, passive analogue switching technology and mechatronic assemblies. It operates in the Automotive Technology, Communication Technology and Industrial Technology segments and has ca. 505 employees at its sites in Passau (Germany) and Prachatice (Czech Republic).

The Automotive Technology segment focuses on innovative products that raise the comfort and safety of cars, improve the performance of electric and hybrid vehicles and reduce carbon emissions. InTiCa Systems' Communication Technology segment is the German market leader in splitters for the transmission of broadband signals, while the Industrial Electronics segment develops and manufactures mechatronic assemblies for the solar industry and other industrial applications.

Forward-looking statements and predictions

This press release contains statements and forecasts referring to the future development of InTiCa Systems AG which are based on current assumptions and estimates by the management that are made using information currently available to them. If the underlying assumptions do not materialize, the actual figures may differ substantially from such estimates. Future developments and results are in fact dependent on a large number of factors; they contain different risks and imponderables and are based on assumptions that may not be accurate. We neither intend nor assume any obligation to update forward-looking statements on an ongoing basis as these are based exclusively on the circumstances prevailing on the date of publication.
